

DAY 6

Create a list of anything you can think of that you might want to accomplish in your life (no matter how big or small).

From everything you listed, circle or highlight the 3 most important things.

OR

Think of one big thing you want to accomplish in your life. Cut out strips of paper, and on each strip write down something you will have to do before you can accomplish that big thing. Write down as many things as you can think of that you'll have to do. Then, create a chain from the strips of paper. Get the strip of paper that has the first thing you'll have to do and tape, glue or staple the ends of that strip of paper together to make a ring. Then get the second strip of paper, but this time put that strip of paper through the first ring you created and then tape, glue or staple the ends so the second ring is attached to the first ring. Continue in order until you get to the big thing you want to accomplish in life.
