

DAY 16

 @Dream_Chasers_org

Tools are everywhere. They're not just things used for construction. As an example, probably just about everything in your kitchen is a tool. Find 5 tools around your home that are the most useful to *you*. What do they help you do?

OR

Create your own tool. Find things around the house you have permission to use and see how you can combine or put things together to come up with your own tool. What does it do? How can it help somebody do something?
